-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sassmann (4,292,927) in view of "Fresh From The Farm" Environmental Health Perspectives, vol. 7 No. 3. Sassmann shows a building 10 configured to house a plurality of hogs, having a concrete pit 18 beneath the building for retaining feces from the hogs; an exhaust port 68 to remove the vapors from the pit and operating a fan 50 to remove the vapors. Sassmann does not teach the use of a filter. "Fresh From The Farm" teaches the use of an exterior filter positioned and oriented for providing an airflow path of air to permit the substantial amount of air to flow through the filter composed of loose organic material/barley straw, see highlighted section page 2. With respect to claims 1 and 15, to use the filter of "Fresh From The Farm" with the building of Sassmann would have been obvious to one skilled in the art in order to more effectively reduce odors vented from the building.

Allowable Subject Matter

Claim 20 is allowed.

Art Unit: 3644

Claims 4-14 and 16-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference are: Mackin et al (5,666,905), Lemmon et al (6,321,687), "Keeping The Big Picture In Mind"- National Hog Farmer Sept. 1999 and "Biofilter media mixture ratio of wood chips and compost treating swine odors"- Water Science and Technology, vol. 44 (9) .
